

Puppy Health Program

So you just adopted a new puppy. Now what?!

This is where we start to help you. We have a puppy health program designed to take much of the initial guesswork out of ownership. It is intended to condense "what you should know" and "what you should do" into a simple, easy to read information source. In this plan we go over vaccines, vaccine schedules, worms and other parasites (such as fleas and heartworms), spaying and neutering, common dog diseases and other bits and pieces of important information for puppy owners.

Ultimately the goal of this program is to make your initial experiences with your new family member both more enjoyable and educational.

The Puppy Health Program bundles together exams, fecal testing for parasites, vaccinations, and more; then discounts all of the prices from our normal cost.

Puppies are often rambunctious little creatures with tons of personality. They tend to be a handful. Questions and problems will arise. Please feel free to use us as a resource to help learn from those situations.

The Puppy Health Programs:

Service	Normal Cost	Puppy Health Program
Office Call	\$72.69	Yes
3 Additional Appts. If needed.	\$49.79 - \$149.37	Yes
First DA ₂ PP vaccine	\$27.62	Yes
Second DA ₂ LPP vaccine	\$27.62	Yes
Third DA ₂ LPP vaccine	\$27.62	Yes
Rabies	\$18.47	Yes
Bordetella (Kennel Cough)	\$24.50	Yes
Fecal Exam for parasites	\$38.08	Yes

Second Fecal Exam	\$38.08	Yes
Worming Medication	\$14.24	Yes
Worming Medication	\$14.24	Yes
TOTAL	\$424.29 – \$523.98	\$305.25

*Every PHP and KHP is different; appointments are as needed to finish the vaccine series. The PHP & KHP ends when your pet gets their final vaccines. Since this is a discounted package there are no additional discounts or refunds if something is not used within the 6 month time frame. Additional fecal tests and deworming may cost extra. Depending on the health of the pet this may be extended. Spay and Neuter is not included in this price.
