

Kitten Health Program

So you just adopted a new kitten. Now what?!

This is where we start to help you. We have a health program designed to take much of the initial guesswork out of ownership. It is intended to condense "what you should know" and "what you should do" into a simple, easy to read information source. In this plan we go over vaccines, vaccine schedules, worms and other parasites (such as fleas and heartworms), spaying and neutering, common cat diseases and other bits and pieces of important information for kitten owners.

The Kitten Health Program bundles together exams, fecal testing for parasites, vaccinations, and more; then discounts all of the prices from our normal cost.

Kittens are often rambunctious little creatures with tons of personality. They tend to be a handful. Questions and problems will arise. Please feel free to use us as a resource to help learn from those situations.

Ultimately the goal of this program is to make the initial experiences with your new family member both more enjoyable and educational.

The Kittens Health Programs:

Service	Normal Cost	Kitten Health Program
Office Call	\$77.69	Yes
3 Additional Appts. If needed	\$50.79 - \$152.3	Yes
First FVRCP vaccine	\$25.70	Yes
Second FVRCP vaccine	\$25.70	Yes
Rabies	\$22.70	Yes
Fecal Exam for parasites	\$44.24	Yes
Second Fecal Exam	\$44.24	Yes
Worming Medication	\$14.24	Yes
Worming Medication	\$14.24	Yes
FeLV/FIV/HWT blood test	\$63.79	Yes
First FeLV vaccine	\$26.70	Yes
Second FeLV vaccine	\$26.70	Yes
TOTAL	\$436.73 – \$538.31	\$224.89

*Every PHP and KHP is different; appointments are as needed to finish the vaccine series. The PHP & KHP ends when your pet gets their final vaccines. Since this is a discounted package there are no additional discounts or refunds if something is not used within the 6 month time frame. Additional fecal tests and deworming may cost extra. Depending on the health of the pet this may be extended. Spay and neutering is not included in this price.
